MODEL 6000 BUBBLE DETECTION

- Gross leak hermeticity testing
- Minimizes fluorocarbon evaporation
- Compliance with Mil Standards
- Built-in filtration system
- Adjustable magnifying lens for improved viewing

MODEL 7000 NID VAPOR / GROSS LEAK DETECTION

- Fast, accurate, & automatic gross leak detection
- Eliminates operator judgment
- Reduces preconditioning times
- Compliance with Mil Standards 883, 750, and 202
- Tube testing available

MODEL 8050 PRECONDITIONING

- Gross & fine (He) leak conditioning
- Compliance with Mil Standards
- Two independent conditioning tanks
- Computer control with self-diagnostics
- Dual fluid filtration system
- Helium only system available

MODEL 9050 CENTRIFUGE

- Microprocessor controlled
- Field proven safe/dependable design
- Regenerative braking for fast cycle times
- Easy loading
- 5hp variable speed, 0-20,000 RPM testing

CENTRIFUGE INSERTS

- In-house design and testing
- Industry standard or custom fixturing available
- Y₁ and/or multi axis testing
- Rework services available
